Subject: Proposed Strategic Planning Framework for Public Comment
Date: Wednesday, June 26, 2019 7:07:20 PM

I know this is a day late, but it would be most helpful to develop guidelines for both insurers and states to follow when submitting recommendations/comments concerning the product standards. Too often, information accompanying recommendations is anecdotal rather than substantiated with the specific statutory/regulatory basis for the comment or without relevant supporting data. With this sort of supporting information, the PSC would have a better context for making decisions.
